

ACCENTURE AND SAP SUSTAINABILITY PARTNERSHIP – CEO VIDEO TRANSCRIPT

Sustainability is our greatest imperative...

...it impacts how businesses operate, compete, and create value...

...but it is also about what leaders and organizations stand for. It is about values.

Businesses are increasingly turning to technology and innovation partners for solutions...

That's why *Accenture and SAP* have *come together*

...to help accelerate our clients' transformation into truly sustainable organizations.

The UN's Sustainable Development Goals set out a clear blueprint for a better future by 2030...

...calling for urgent action such as:

...implementing responsible production and consumption

...improving equality...

...and providing access to affordable and clean energy

– all to promote prosperity while protecting our planet.

These are ambitious goals.

So, to help organizations achieve them...

...we're bringing together *Accenture's* technology and human ingenuity...

...with *SAP's* next-generation intelligent solutions...

...to provide insights that drive better decision-making across the value chain.

We are combining our shared passion for innovation...

...to help our clients embed sustainability into their core business operations.

We're co-developing innovative design solutions. Solutions that include circular economy capabilities.

Allowing organizations to cut waste and deliver more sustainable packaging in their supply chains.

We're engaging start-ups, bringing their fresh ideas into our ecosystem...

...and we're helping companies measure and minimize their carbon footprint across the value chain.

These solutions will help create a more balanced, fair economy.

And they will help unlock new opportunities,
more value and long-term growth.
Combining the best of all worlds.

We're proud of this industry-first collaboration in
enterprise and supply chain solutions...
...to create long-lasting action to support our
clients' journeys.

...making our world a better place, now and for
generations to come.
