

High performance. Delivered.

Total FY07 Community Investment, Accenture UK

We know that the future prosperity of our business depends in part on a thriving, stable and diverse community. This is why we are keen to ensure that we maximize our positive impact on our local communities.

The key objective behind our community investment and engagement programmes is to tackle issues of social exclusion and to ensure better futures for all. We do this by supporting initiatives that aim to equip people with the necessary life and work skills that will enable them to secure independent and sustainable livelihoods.

Please see the table below for specific details about our FY07 investment.
