

Sustainability is more than a buzzword: it brings value to your business

Accenture's Asset Management approach combined with HPE Financial Services can unlock sustainability for your business.

Accenture's expertise with the Circular Economy coupled with HPE's hardware expertise and financial services can **increase innovation, create and improve sustainability metrics, and drive revenue from disposed assets.**

Our Offering: Out with the old, in with the new

The Old - Linear Economy

Traditional asset management involves purchasing, using, then disposing of assets

The New - Circular Economy

Adapting to a more sustainable business model comes with tangible value : refurbish, recover and resell assets to utilize their full lifespans

REFURBISH

Another Man's Trash

Devices with **useful components** are **repurposed** into new devices

RECOVER

Unleashing Hidden Value

Most enterprise hardware contains **valuable materials not being recovered.**

RESELL

Short Lived Performance

Servers replaced every **three to five years**, on average.

Asset Management as a Service

An AHBG solution

Sustainability

The Benefits: Value at your fingertips

Taking a sustainable approach to Asset Management can benefit both your enterprise and the Earth.

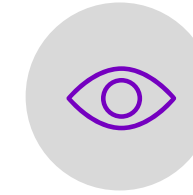

Reduction in procurement costs

Global consistency in your IT Asset approach

Accountability and Security

Visibility into Sustainability Practices

Comprehensive Reporting to Investors

Case Study: Accenture Device Asset Management – HPE Manages It Assets From Start To Finish

Objective: Accenture was streamlining its global asset disposition supply chain to track the full lifecycle of assets, decrease global security risk, increase efficiency and add reporting capabilities.

Approach: HPE FS helped Accenture advance its circular economy business objectives by extending the life of its IT assets, then securely tracking and disposing of assets, and quantifying the environmental savings derived.

Solution: HPE Asset Upcycling Services alongside HPE Circular Economy Report

“Rather than just sending our products to a recycling facility, utilizing HPE Asset Upcycling Services enables us to extend the life of our assets. This is critical for meeting sustainability goals and reaffirms our commitment to be good global citizens.”

– Renee Cordova Lottes, CIO Platform Management, Strategic Initiatives Lead, Accenture
