Enterprise clients demand a **Connectivity Environment** that blends seamlessly with their **Digital Transformation** requirements. This not only requires access to the full capabilities of a **5G network** but also a low threshold to access a rich **Application Ecosystem**.

Offering Description

The **Accenture 5G Cloud Box** is a platform which allows easy development of applications which maximizes the benefits of 5G technology and can be tailored for specific enterprise needs

Value Proposition

- **Simplicity** – Pre-engineered E2E solution to easily access to high-performance network connectivity services
- **Cost efficiency** – Robust business case to support different edge development scenarios
- **Flexibility** – Best-in-class solutions, partners, and network equipment providers to address various scenarios
- **Control** – Control over network, devices, data and insight into performance
- **Support** – Seamless integration with enterprise applications

Capabilities

- Pre-integrated HW and cloud infrastructure with e2e automation
- App store for creating next generation industry use cases
- Consumption-based pricing model for faster RoI
- 360° service model and enterprise integration by Accenture

TELCO & 5G CLOUD

Industry-Tailored Offering
An AHBG solution

Partner Play: HPE 5G Core Stack at a glance

Accenture 's **5G Cloud Box solution** leverages **HPE's 5G technology** offering that is built ground up for cloud-native, multivendor infrastructure and applications. **HPE 5G Core Stack** provides a fully pre-integrated 5G solution that's ready to deploy and consumable on a pay-as-you-go basis

### Build on Cloud Native Principles

- Adherence to Open Standards
- Open Ecosystem of partners , no vendor lock in

Consumption Based Pricing

- HPE Core Telco Blueprint
- RedHat Open Shift PaaS
- HPE Shared Data Layer
- HPE 3rd party network functions
- HPE Orchestration & Assurance

Fully Automated deployment & configuration

- Scaling and slicing on demand
- CI/CD enabled for incremental changes and updates

Automation & Orchestration

HPE NF1	HPE NF2	Partner NF3	Partner NF3

Shared Data Layer

Platform as a service (PaaS)

Compute	Storage	Networking

HPE Product   Pre-Integrated third-party product

Accenture Core Offering: 5G Cloud Box

- Strategy and Consulting
- Design and Deployment
- Operations

+

HPE 5G Platforms

- 4G (HSS/HLR)
- 5G CNFs
- HPE Shared Data Layer
- 5G SA for Enterprise
- Telco Cloud Blueprint

=

Benefits

- Topline cost optimization
- Time to Market
- Capex optimization, Time to Market
- **30%** on infrastructure license/license
- **40%** for 5G capex reduction
