WELCOME TO THE CYBER FUSION CENTER IN WASHINGTON, DC

VIDEO TRANSCRIPT

At the Accenture Cyber Fusion Center in Washington, DC, we're making the kind of advances that hackers won't like a single bit … but organizations that want to build business resilience will love.

This isn't just a place. It's an experience. The DC Cyber Fusion Center, Accenture's first in North America, joins our network of Cyber Fusion Centers, Cyber Labs and Delivery Centers across the globe.

In DC… boundary pushing meets reality. We specialize in turning vibrant and sophisticated cyber research and world-class threat intelligence into practical innovations. Ones you can see in action … and apply now.

We're accelerating cyber security with: "think-like-attackers" simulations, predictive analytics, the largest collection of threat intelligence, advanced incident response services and security operations transformation.

What makes our center so vibrant? The brains behind the ideas. We harness the collective intelligence of our global security professionals, clients, partners and renowned researchers and data scientists.

No wonder industry analysts like what they're seeing. They see we're moving quickly. They understand the power of our industry focus.

Know your threat…providing world-class threat intelligence services for clients.
Be your threat…thinking and acting like attackers to help clients avoid becoming a casualty.
See your threat…employing breakthrough predictive analytics to thwart the most advanced attackers.
Expel the threat…serving the highest level of digital forensics and incident response capabilities to respond immediately and effectively to client breaches.

The Accenture Cyber Fusion Center in DC.

Where the future of security is being applied. Now.
