Personal Protective Equipment (PPE) is used every day by healthcare workers to protect themselves and their patients.

On average there are 29 steps to safely don and doff PPE. (Source: US Centers for Disease Control and Prevention)

Mistakes are common and cause infection.

69% of COVID-19 cases in Ottawa were healthcare workers. (Source: Ottawa Public Health, June 2020)

A recent study found VR was 76% more effective in training healthcare workers on PPE protocol. (Source: NHS Immersive Technology)

Standard training spoils PPE which is in short supply.

In VR, the learner can test decisions and can fail without risk.
