The Accenture Connected Analytics Experience – Video
Innovation doesn’t happen singularly, it requires collaboration – collaboration among people, data and technology. So change the relationship with your data, join us on a leading edge analytics journey.

The Accenture Connected Analytics Experience is an immersive and collaborative analytics environment that makes data more accessible and engaging, helping insight-driven businesses to make faster, more informed decisions. The Experience is designed to take an extensive range of business users on an integrated analytics journey, transforming their relationships with data and fueling their efforts to defend, differentiate and disrupt.

Our highly-skilled, multi-disciplinary teams combine leading-edge, industry-focused technology, assets and research to allow you to connect with your data.

As we bring your data to life through visually captivating presentations and storytelling, you can perform explanatory analytics, act on insights and make laser-sharp decisions...all in a mediated and collaborative environment.

The experience is powered by our end-to-end analytics capabilities with analytics strategy, a multidisciplinary data insights team, a data platform containing big data technologies and an analytics center of excellence — all anchored within an immersive environment.

While each company’s discovery is unique, it will be infused with Accenture’s deep industry knowledge, technology agnostic view and strategic approach to building the right teams, mobilizing the right information at the right time and communicating with clarity and precision throughout your organization.

Your journey to become an insight-powered enterprise begins with the Accenture Connected Analytics Experience.
