High performance. Delivered.

DevOps: Helping you deliver applications at the pace of business

Video Transcript

In today's high-velocity business world, the ability to roll out improved business capabilities continuously will be a matter of survival.

How will you deliver applications at the pace your business demands?

Enter DevOps—a set of innovative engineering practices designed to continuously deliver faster, more predictable applications with greater efficiency.

DevOps streamlines and accelerates the interaction between development teams and operations teams.

It enables more meaningful collaboration through process automation and aligned goals—creating the agility your company needs to scale your business and enter new markets.

Jumpstart your DevOps journey with Accenture today.

We offer comprehensive services for digital and enterprise applications, from strategy to assessment to implementation.

Accenture will help you address your:

- Team structure
- Cloud strategy
- Application strategy, and
- A transition strategy for your enterprise applications.

Tap into the full power of Accenture to drive value.

We bring you:

Complex delivery experience to successfully scale DevOps practices

Comprehensive methods and tools
to reduce costs and increase
adoption speed

And skilled people—with nearly
1,000 DevOps practitioners and
12,000 trained Agile developers.

That's why Accenture can deliver
benefits such as:

- Up to 50 percent increase in
speed to market
- New features provided to the
customer within days rather than
weeks or months
- 30 percent reduction in defects
in later test phases
- 10 to 20 percent cost reduction
across application delivery

Are you ready to make the shift to
high-speed delivery?

Sharpen your competitive edge with
DevOps services from Accenture.
