High performance. Delivered.

Accenture Avanade Microsoft

Video Transcript

Today's business environment has never been more competitive.

Victory goes to the agile, the efficient, the strong.

Opportunities abound. But to make the most of them, it pays to have an advantage, a game changer, a team.

It pays to have the alliance of Accenture, Microsoft and their joint venture, Avanade.

Accenture's business and industry expertise, Avanade's world-class business technology services and Microsoft's innovation and

technology solutions.

We have a single objective: provide enterprise solutions that deliver high performance so you can realize results.

Pulling together with our clients, we offer seamless teamwork and an unmatched breadth of capabilities.

Our alliance was formed in 2000, and has only become stronger. When the world's leading enterprises want to innovate, they've turned to us.

Like the Fortune 500 healthcare

provider who we helped migrate its 35,000 employees to Windows 7, and save up to \$14 million in the process.

We've completed over 10,000 successful projects for hundreds of enterprise clients worldwide – and counting.

Just ask the oil and gas exploration company who needed an online application to track drilling. Using Microsoft .NET and Microsoft SharePoint Server, we implemented a solution that cut drilling costs by 20 percent and reduced the drilling platform incident rate by 40 percent.

The talent we bring to bear is staggering. The largest collection of Microsoft-skilled resources in the world – over 55,000 – with an array of over 110 solutions, both industry-specific and cross-industry.

Like the real-time business intelligence platform we built for a Japanese construction and transportation equipment company. Using Microsoft SQL Server and Microsoft SharePoint Server, we cut costs related to reporting by 15 percent.

Our alliance has taken industry leadership in cloud, by deploying 2 million seats of Office365.

Accenture and Avanade is also the only global services provider to have an agreement with Microsoft to provide an end-to-end public cloud solution on the Windows Azure platform.

Using that expertise, we recently helped a global leader in supply chain management for humanitarian relief move to a Windows Azure platform, reducing data center costs by 80 percent and server-related costs by 20 percent overall.

We're also at the forefront of delivering Microsoft Dynamics-based solutions. A global leader in digital display technology partnered with us to build a new infrastructure with Microsoft Dynamics AX and implemented Microsoft Dynamics CRM to help sales and drive revenue. The result was a 125 percent increase in productivity and a 65 percent reduction in annual IT costs.

Time and again, all over the globe, our solutions are game changers for our clients. It's why Accenture and Avanade have earned more awards than any other partner from clients, industry and Microsoft.

Just imagine what we could do to help unleash your potential.

The alliance of Accenture, Avanade, Microsoft and you.

Together we can transform your business by providing solutions that increase performance, realize results and deliver success.
