

Accenture Software

High performance. Delivered.

Accenture Software combines deep technology acumen with industry knowledge to develop market-leading software products. A dedicated global organization, Accenture Software offers innovative software solutions and the unmatched skills of experienced professionals to enable you to meet your business goals and achieve high performance.

Looking for comprehensive software solutions with rapid returns? Accenture Software can help companies and governments achieve business results faster and at lower cost. As well as building our own software, we also collaborate with market leaders such as Microsoft, Oracle and SAP to develop industry enhancements or accelerators of their proprietary software products or create entirely new products together.

Accenture Software for Banking has both its own core banking solution, Alnova Financial Solutions,[™] and a long-standing collaboration with SAP and Oracle in this sector. Therefore, we facilitate and accelerate various approaches to core banking transformation according to the needs of a specific financial institution.

Ensuring reliability and choice

With a team of more than 1,800 professionals¹ across the world, Accenture Software comprises a portfolio of software businesses. Each business is focused on a specific industry or business function and

has a strong track record of developing intellectual property. Drawing on the combination of software and services Accenture offers, organizations gain greater value through customization that meets specific business needs. What is more, the quality of a customized solution at "off-the-shelf" software prices introduces a new kind of predictability that lessens the risk of traditional software models. So whether it is helping to manage banks or schedule ships, Accenture Software professionals engineer products that offer you choices to match your business goals.

"It is our commitment to tangible business results, together with our industry, process, technology architecture, and software skills and experience that puts Accenture at the forefront of the market."

Colin Davies, managing director
Accenture Software

¹ As of February 1, 2010.

Focusing on business outcomes

Maybe you just need software. Or maybe you are looking for an end-to-end solution that includes consulting or outsourcing. Whatever your requirements, Accenture Software brings the right combination of industry, process, technology architecture and software to realize results. Grounded in our deep understanding of business processes, our software is derived from our High Performance Business research into more than 6,000 organizations and is architected to offer models to implement business process management (BPM) and advanced business analytics and insight. Indeed, we have more than 20,000 process and industry model elements defined for 56 industry segments.

Delivering superior software

Accenture Software develops market-recognized products that are cost-effective, high in quality and low in risk. Well-architected and functionally rich, our software lies at the heart of your business. Accenture software products are easy to implement and have low operating cost, using tools and accelerators to speed up implementation and the return on your investment. Furthermore, by simplifying implementation, you attain even higher predictability.

Accenture Software realizes you need to combine pragmatism with progress and take advantage of practical implementations of new technologies. We are enhancing our software to run in the cloud and be delivered via a Software-as-a-Service model to bring you reduced and flexible computing costs. We are enabling our software

to support business with mobile, Web 2.0 and other future-user computing models so that you can be ready for the collaborative, mobile and user-centered IT of the future.

Accenture Claim Components Solution has received a "Strong Positive" rating, the highest possible rating, in Gartner's MarketScope for North American Property & Casualty Insurance Claims Administration Systems, published June 9, 2009.²

Achieving high performance

Accenture Software offers the right combination of technology and business skills that will help you achieve better business outcomes. Whether you want to make enterprise-wide technology improvements or undertake a complex business transformation, organizations that employ the resources of a team with a wealth of experience and differentiated tools can achieve a new kind of flexibility that helps place them firmly on the path to high performance.

Our fully integrated and industrialized suite of software products in Freight & Logistics Management is based on a common platform and brings together greater transparency of costs for improved pricing strategies and better management of allocations to enable powerful decision making that minimizes risk and adds value to the business.

"The idea of using our HR systems without Clone and Test [from Accenture Software for SAP HCM] is inconceivable for us."

Georg Scholz, Consultant, SAP HR Application Support, Degussa AG
