INNOVATION FOR THE ROAD AHEAD
We provide a broad range of services and solutions in strategy, consulting, digital, technology and operations.

We help organizations maximize their performance and achieve their vision.

We develop and implement technology solutions to improve our clients’ productivity and efficiency—and may run parts of their business.

Ultimately, we enable our clients to become high-performance business and governments.
WE ARE TAKING AN INNOVATION-LED APPROACH TO TRANSFORMING ACCENTURE

We have taken bold strategic actions over the last few years to drive differentiation and make Accenture the leading professional services company in the new digital world:

- Transforming our BUSINESS ARCHITECTURE by aligning Accenture around five distinct businesses, all operating at scale and highly competitive

- Transforming the NATURE OF OUR SERVICES by rotating rapidly to the NEW – digital, cloud, and security-related services

- Transforming our INVESTMENT PROFILE by significantly stepping up our investments in new and high-growth areas, especially through acquisitions
WE PROVIDE END-TO-END SERVICES FOR OUR CLIENTS ACROSS OUR FIVE BUSINESSES TO DELIVER VALUE AND ENABLE RESULTS

**HOW WE DO IT – THE ACCENTURE WAY**

**Schneider Electric**
Accenture collaborated with Schneider Electric to build a Digital Services Factory to help scale new offerings rapidly. The Factory will provide a range of services to speed development from ideation to industrialization. Within the first seven months, it created a vision and strategic intent to drive digital offerings across seven domains and cut the time from product ideation to market testing from three years to less than eight months. Accenture is working with a Global Automotive Tier 1 on an enterprise product development transformation. The goal is to unify the company’s historically fractured hardware and software development cycles while better adopting systems engineering capabilities. This work involves a new operating model, and reinventing 30-year old legacy product development processes to be more Lean and Agile as well as culture, process and tool changes.

**Biesse Group**
Accenture is helping woodworking machinery manufacture Biesse Group with a new solution and roadmap to generate greater value from machines. Pilot services included preventive maintenance alerts, machine management and manufacturing events analysis. Sensors and devices on the machines produce in-depth analytics for display on easy-to-view dashboards on mobile devices. As part of the full rollout, Biesse’s customers will be able to use a pay-per-use model and customize the services they receive—from machine alerts to advanced services like in-depth machine analytics—that improve the customer’s overall equipment effectiveness and productivity.

**Rio Tinto**
Accenture is helping Rio Tinto track over 1,800 contractors with RFID tags during an industrial shutdown. Tracking is helping to improve management of workforce time on tools, better management of fatigue, management of density alerts, and improved financial reconciliation. Data captured wirelessly from workers is also being used to determine how future shutdowns can be better managed.
HIGH PERFORMANCE DELIVERED

- Brought Warner Brothers’ film catalog from the golden age to the digital age.

- Michelin can now locate spare parts globally in under five seconds.

- Our mobile expertise let Ducati riders order their perfect bike.

- Helped American Express build 1 digital platform. Their customers added $7 billion.

- Working with P&G to cut time to market in half for select products.

- Worked with Marriott to grow annual online sales to $7 billion.
