

IWD 2019: TECH ACCELERATES CHANGE FOR THE BETTER

VIDEO TRANSCRIPT

Anne Groeppelin: My name is Anne Groeppelin and I lead our Accenture Labs Technology for Good program in Europe.

In Accenture, we love technology and innovation, but with a purpose. Our Technology for Good program aims at building a more sustainable and inclusive world, by leveraging the power of emerging technologies like artificial intelligence, blockchain or extended reality. We collaborate across the globe with our ecosystem partners inside and outside Accenture, and we act as a force multiplier for those organizations that work for the greater good of the society.

Our innovations are driven by our culture of equality and inclusion. We want to create an environment in which everyone can advance and thrive. We don't want to just dream the future. We want to create it. So I'll let you discover some of our most present achievements, and I hope you'll join the force.
