# Accenture Insights Platform Video

## Accenture Insights Platform Video Transcript

Analytics is illuminating the digital world. The real industry leaders driving business transformation are equipping themselves to make clearer and smarter decisions at speed and at scale.

As technology continues to disrupt, Accenture Analytics illuminates the intersection of technology and business by helping our clients become insight-driven enterprises with the Accenture Insights Platform.

The Accenture Insights Platform offers a simple turn-key solution that allows organizations to get actionable insights and business outcomes quickly and efficiently.

Our comprehensive, pre-configured end-to-end solution is comprised of an integrated suite of leading technologies that can typically be provisioned in 24 hours, enabled in days, and start generating actionable insights within weeks, enabling organizations to become truly agile in responding to a fast moving global marketplace.

We provide integrated, best-in-class, enterprise-ready security and 24/7 enterprise customer support, including centralized management and monitoring through our command and control center.

The platform is designed to support a catalog of industry and business function applications that puts insights into the hands of business users.

A consumption-based flexible commercial model that eliminates the need for large, up-front capital expenditures making it easy for clients to expand to new technologies and benefit from Accenture's ongoing research and development.

Illuminate your insights-powered enterprise ready to defend, differentiate and disrupt with the Accenture Insights Platform

Fast, Flexible and Transformational.
