

High performance. Delivered.

**Accenture
Consulting Careers
in Communications,
Media & Technology**

Grow your career transforming Communications, Media & Technology clients.

Deborah Ford

My name is Deborah and people inspire me.

When you are around people who emulate the things that you want to be, it helps you to become a better person and makes you feel that you are growing.

Elias Aseged

Hi, name is Elias and technology inspires me.

Before I came to Accenture, my career was sort of stagnating.

Elias Aseged

Accenture really afforded me that opportunity to work at the leading edge of technology.

Deborah Ford

I work in CMT which is all about high tech industry, which could not be more exciting.

At my current client we have been highly involved in taking them to a more mobile digital experience, and to see their reaction and how they are being able to be more and more productive is really, very rewarding.

Elias Aseged

Accenture Consulting is great place to work because we really get an opportunity to help solve our client's toughest challenges.

In my current role, I'm serving one of the largest e-commerce retailers in, in a marketing strategy capacity to work more agile and to be more nimble.

At the end of the day, our work isn't done unless our clients are really successful. That's what's truly transformational.

Deborah Ford

Transformational doing is about being proactive. It's the call to action to propel you to that next level.

Our clients are our team members. We are really working to drive innovation together.

Elias Aseged

Accenture is innovative.

Deborah Ford

Accenture is a lot of fun.

Deborah Ford

In CMT I think you have to be an individual who is wanting to learn, continuously growing, because the technology is changing, the clients are changing, the landscape is changing.

Deborah Ford

When you get into your current role, you can actually be proactive enough to shape that role and build it into what you want it to be.

Elias Aseged

You have to be fearless. That's what our clients expect from us.

They're looking for people who can help them become great companies, and I think that's what Accenture really does.
