

# MIGRATE YOUR SAP WORKLOADS TO AWS WITH CONFIDENCE

ACCENTURE: YOUR GUIDE FOR BUSINESS-CRITICAL MIGRATIONS

Enterprises across all industries are considering large-scale moves to the cloud. Whether your organization is looking to improve operational efficiency, take advantage of the speed and scale that automated computing provides, or achieve a lower TCO, you are likely already aware that migrating to Amazon Web Services (AWS) will enable you to meet those goals.

But how will you get there? Do you have the necessary skills and resources in-house to successfully execute a seamless migration? And if so, are you willing to divert that much time and energy away from other forward-facing business initiatives? Delays and cost overruns aren't an option for business-critical workloads like your SAP applications.

**You aren't alone.**

## 5 Big Reasons to Run SAP on AWS

- Certified and Validated Platform
- Secure and Compliant
- High Performance and Agile
- Reliable and Resilient
- Cost Effective

You can now build scale-out **SAP HANA** clusters with up to **34 TB** of memory.

## THE ACCENTURE AWS BUSINESS GROUP CAN HELP

Accenture and AWS established the Accenture AWS Business Group (AABG) to enable enterprises to accelerate their adoption of AWS, including SAP on AWS, and rapidly deliver new business value.

With Accenture on your side for SAP migration and operation, you can expect:

### A Proven Approach

Accenture is SAP's leading partner and largest implementer of SAP HANA-based solutions and applications globally.

### An Experienced Partner

Accenture has 11 years of AWS experience and is made up of 2500+ Accenture Cloud technologists and 600+ AWS-certified professionals.

### Advanced Tooling

Accenture employs end-to-end processes and automation tools to significantly increase operational efficiency and lower TCO.

# ACCENTURE UNIFIED DELIVERY MODEL

**Expertise. Knowledgeable staff. Advanced tools.**

**A proven approach to migrating, streamlining, and running your SAP applications on AWS.**

The Accenture Unified Delivery Model provides enterprises with solution development and implementation, along with 24/7 operations for value driven delivery with continuous improvement processes. It also delivers end-to-end optimization and automation tools and services for planning, building, and running your SAP environments on AWS, as well as a standardized architecture to lower TCO.

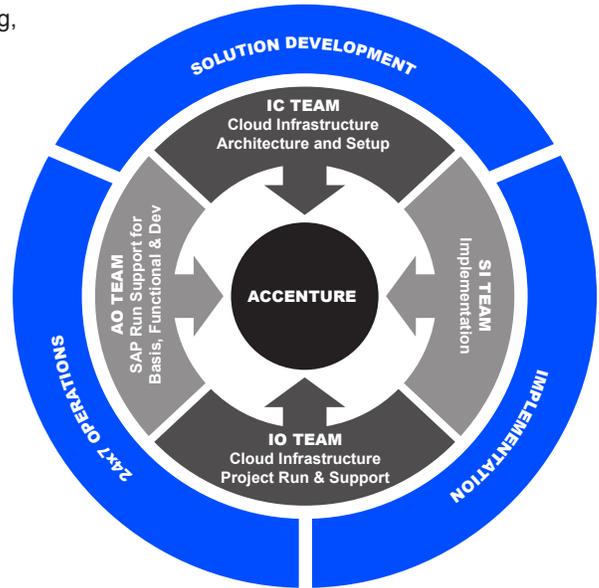

This model creates single delivery ownership and accountability with integrated monitoring and service management.

When you try to go on the cloud you can't just say, 'Hey, we're going to the cloud.' You say, 'Let's bring in Accenture.'

Jim Cramer, Mad Money

## WITH ACCENTURE AS YOUR GUIDE, YOU CAN:

### Accelerate Migration with Automation Tools

Reduce the time it takes to migrate your SAP portfolio by up to 20%.

### Improve Operational Efficiency

Increase operational efficiency by provisioning your SAP applications in minutes instead of days.
