**[VO]** It made me feel comfortable knowing that the place I was joining was somewhere where I can continue to learn, grow and question.

Whether you start in Technology, Operations, Strategy and Consulting, Industry x or Interactive, you can continuously learn and grow your skills to follow your purpose.

Everybody's willing to share their knowledge and their expertise to help you grow, which I feel like is quite unique about Accenture.

Every day, all over the world, our people are delivering on the promise of human ingenuity combined with technology to solve some of the world's biggest challenges.

I'm in a project dealing with air cargo, tracing production of carbon dioxide.

So I was using geo-spatial data to help the smallholder farmers in East Africa.

I was working for this children's charity and we delivered a manifesto for new humanitarian fund.

I'm working on a project where we are implementing patient first solutions to improve healthcare in Singapore.

I'm contributing to the UK reach its goal of net zero by 2050, and for me, that's a really strong driving force in my day job.
