

## GENDER BALANCE IS KEY

We all wake up every morning.

Each in our own way.

Some like to rise early...

While others don't.

Some people jumpstart their day

Take a minute for themselves ...

Or share a moment together.

Sometimes being attentive can make all the difference

And so can truly listening.

Men and women are unique, in their own special ways.

But together, we can strike the perfect balance.

Creating an environment where

people succeed every day

It's diversity that makes Accenture effective, powerful, open and engaged.

For us, gender balance is key. And making it 50/50 by 2025 is our goal.
