Hi, my name is Martha Mends, I’m on my morning commute. It’s bright and early and excited for the day ahead.

One of the key reasons I joined Accenture is our focus on digital. You get training whether it’s online courses or community courses and on different topics such as analytics, Tableau, Sequel.

Hi everyone, currently walking towards a team dinner, I’m in central London and you know, definitely at Accenture you get to travel. In terms of what I like most about the firm is the work and the variety. In M and A I’ve been on so many different types of projects and roles, I’ve been on commercial due diligences, which tend to have a fast learning pace. I’m currently working on the investment strategy for a firm so it’s really, really varied which I love.

Currently, on my way to Heathrow airport, we have training, training takes place in Chicago which is fantastic.

Hi, I’m at M and A Live, which is a time when we get to learn about the different skills you need to be an M and A practitioner. I’m with my colleagues from around the globe.

One of the great things about working at Accenture is the sense of community you get here. Whatever you are passionate about there is so many ways to explore further and there really are ways to find like-minded people at Accenture.
