

# BE YOURSELF, MAKE A DIFFERENCE.

## VIDEO TRANSCRIPT

### MEET RAH

I actually coach youth football, it's actually a big passion of mine. This is a great opportunity for me you know, to just go in there and just help out the kids. I saw that the main problem was that they didn't understand the fundamentals. So, I stopped all the complex plays and said, hey guys we're going to practice four plays. You know I made the process more efficient, right.

This is exactly what we do at Accenture. We look at this big huge process and then we say let's figure out where we can make all these efficiencies so that we can run even faster. We analyze the Cloud environment and their portfolio of applications for clients and then help them migrate those applications to the Cloud. We streamlined a lot of those steps and then we allowed robotics to come in and actually execute them to scale pretty fast.

Teams are what really get me jazzed up at Accenture. One of my core sets is really building effective teams and allowing them to sort of fit together and gel together and sort of rise to the top and really deliver innovative solutions for our clients.

My name is Rah Thomas, I'm a Cloud solution Architect and Delivery Lead for Accenture.
