

# UNLEASH, EL MAYOR EVENTO DE TALENTO JOVEN DEL MUNDO

## VIDEO TRANSCRIPT

What we believe is that the only way to actually change the world on which this transformation forward is by putting talent in the middle of absolutely everything and that's what we are here, because we wanted to create something for the youth by the youth to make sure that our generation plays the role that we deserve in this whole transformation.

### DIVERSITY:

It is true it's a source of creativity and innovation which is one of our most popular DNA of Accenture.

First thing I learned when I joined this company it doesn't matter where you come from, what you like, what really matters that thing that makes you really special, unique, with a special talent, in Accenture we are looking for a talent, whatever it is.

I'm a content design analyst in Accenture Interactive at this part of Accenture digital, but yeah you know I'm also a creator a concert photographer, I'm a music editor in several digital magazines.

Our generation has so much potential, so much to offer and that we are going to contribute so much the world is like people are like Millennials, we are amazing.

You just have to be fearless and get the courage to become "The best version of yourself"

Life is something that you create by interpreting the world with your sensors, because in the end if you believe that something is possible, it's much more likely to become possible than if you think if it's not.
