Hi - my name is Stuart, and I lead our Financial Services Technology Advisory practice in Greater China

We are living in the age of DISRUPTION and UPHEAVAL.

New technology is in many ways BOTH the cause AND the cure.

Accenture's Financial Services Technology Advisory practice is here to help banks, capital markets and insurance firms to blaze a new technology path forward to NAVIGATE and COUNTER this upheaval.

We do this by applying a solution-focused approach, experienced based analysis, deep insights and unique capabilities to help make our Clients CLOUD READY, unlocking the VALUE OF EMERGING TECHNOLOGIES such as ARTIFICIAL INTELLIGENCE, or BLOCKCHAIN and rotating to the New with BREAKTHROUGH BUSINESS MODELS.

One such example of a high performance outcome our team delivered was for a regional insurer. We embarked on a focused 9 month program with our Client to deliver their Digital & Agile transformation journey

across Asia, from the C-suite through to their regional call centre – our methodology, approach and technology expertise helped our Client better understand customers needs, get product to market quicker, improve servicing and therefore increase customer satisfaction!! A GREAT OUTCOME – delivered by a FANTASTIC team!

---

Hiring the best talent is THE key to delivering the BEST client outcomes.

So, come and talk to us at Accenture if you are a TECHNOLOGIST with a strong FS industry track record within a Consulting or Financial services organization.

You will join a fast growing team that is helping our CLIENTS to embrace the power of DISRUPTIVE TECHNOLOGIES, allowing them to drive innovation and sustainable growth for their enterprise.

I look forward to meeting and working with you!!
