

# TECHNOLOGY INTERNSHIP PROGRAM

## VIDEO TRANSCRIPT

**Cosmina:** Hi, I'm Cosmina, CRM developer and I've been working in Accenture for one year.

**Vlad:** Hi, I'm Vlad, RPA Developer working in Accenture for one year.

**Cosmina:** What I liked the most about the internship was the fact that I had the right people next to me from whom I could learn, and I wasn't afraid of making mistakes because everybody was friendly and willing to help.

**Cosmina:** During the internship I realized one thing about Accenture – that we're not a single technology company, we are many technologies company– and that gives me career experience I could not get anywhere else.

**Vlad:** I've discovered a whole world of technology that I get to explore at Accenture. So many that I could fill an alphabet from A to Z!

**Vlad:** I'm constantly learning by working with new Robot Process Automation technologies, and by doing so, I even managed to get certified in some of them.

**Vlad:** Working in Accenture is rather ...interesting.

**Vlad:** I love working with my team and I'm constantly develop new skills, both social and professional. Come innovate with us
