INSPIRATION

VIDEO TRANSCRIPT

What does an industrial revolution feel like?

Well, just like this.

Like this moment, right now.

It doesn't feel momentous,

Until we see it in the rear-view mirror.

And we don't feel its full impact,

Unless we have new intelligence to realize it.

Intelligence changes, not just how we think,

But industry itself and the very products it makes.

Intelligence is Industry's X.

The element that unlocks its full potential.

The potential for factories and plants to talk to
one another

across vast distances.

For manufacturing networks to run themselves.

For products to be created virtually, to think for
themselves,

to learn every day.

Right now, we have the power

to make industry more impactful for the world.

More efficient, more sustainable,

Inclusive, meaningful and safer.
