

## Accenture Industry X

Internship – Video – Transcript

### **Speaker 1 - Laura**

I chose Accenture because it seemed to give me an insight into the future career I've been dreaming of, and in the end, it really did.

### **Speaker 2 - Róbert**

I chose Accenture because of my passion for the software and the curiosity about the background processes.

### **Speaker 3 - Miruna**

The project I worked on opened a completely new door for me. It turns out there was a whole new world for user to robot communication out there, of which I haven't heard of before, and it was just waiting to be explored.

### **Speaker 2 - Róbert**

We had the chance to work with ROS, an operating system, which I haven't used before.

### **Speaker 1 - Laura**

The project I've been working on, I am very excited about, because I learned how to configure a robotic arm and how to use its limitations into my favor to make it work and do the job in the most efficient way.

### **Speaker 3 - Miruna**

The environment at Accenture was a very welcoming one. The mentors were supportive and open to our ideas, and they would answer all of our questions. Regarding the colleagues, social distancing didn't stop us from interacting and getting to know each other.

### **Speaker 2 - Róbert**

Accenture took all the necessary precautions in order to let us work on site.

### **Speaker 1 - Laura**

The Accenture environment is very friendly, especially because everybody is so open to help you with the problems you encounter and to give you solutions about how to fix them.
