

# ACCENTURE CONSULTING CAREERS VIDEO TRANSCRIPT

## **CATHINKA WAHLSTROM NORTH AMERICA FINANCIAL SERVICES PRACTICE LEADER**

I've been consulting in this industry for more than 20 years and I frequently hear people talk about the changing landscape of financial services. I would say that this sense of constant change in the sector is really nothing new. But what has changed and what is different is the incredible PACE of change. We continue to see new and quite different competitors and entrants into the market, we see impactful demographic changes and most of all – of course – we see technology developments.

At Accenture, we like change and we like speed and most of all we love to help our clients take advantage of new development and opportunities to grow their businesses.

When they are successful, we are as well. Right now I am really excited about the practical innovations we are bringing to our clients in areas such as customer experience, cloud, robotics, artificial intelligence, analytics and cybersecurity.

This really is an amazing time to work with financial services clients at Accenture. The world's biggest and best companies are counting on Accenture to help them adapt and thrive in this new world. And we need smart, dynamic people to help us do it.

I hope we have a chance to meet you and welcome you to the team soon.
