Gearing Up for Growth Using Multi-Speed IT Video

Voiceover Transcript

November 2015

VOICEOVER:

Here's a checklist for every tech executive:

- Rapidly innovate for growth
- Make steady progress on strategic priorities
- And keep processes and systems running every day

Digital is creating a culture of speed that business and technology executives need to manage in a whole new way.

More than multitasking, it is about multi-speed IT.

That means: shifting to the right gear at the right time to support multiple business agendas.

To master the art of multi-speed IT, CIOs should adopt a four point plan:

1. Recognize there is a need for IT consumption at different speeds.
2. Employ multiple governance and methods.
3. Rethink architecture needs to align with the pace of change.
4. Invent the new IT organization, one that supports a multi-speed agenda.

Learn how to put the right multi-speed IT operating model in place.
