

# MEET THE MINDS. RENATA MOREIRA

## VIDEO TRANSCRIPT

Hi, my name is Renata. I am a technology consulting analyst. I am definitely an analytical mind type and that comes out in my personal life, as well as professionally.

As an analytical mind, I see what's beyond the numbers and how it fits into the bigger picture. So I have thought about this a lot, how my colleagues would describe me.

First one I think, outgoing. I talk a lot, fairly confident.

Second, inquisitive. Whenever there is any kind of the knowledge sharing sessions, the graduate events. First one with my hand up, every time.

Third, I am very caring. I'll bring homemade cookies or brownies or something when we're having our spirit planning sessions, so kick-offs. Little things, that I like to show that I care.

Being at Accenture, it's exactly where I wanted to be. It's exactly in line with my plans. It's what I though Accenture would be like, but so much better.
