SHAPING A BETTER TOMORROW
Dear reader,

At Accenture, our vision is to improve the way the world works and lives. We recognize that the post-digital era and the rapid pace of innovation are bringing with them economic and social uncertainties, which are changing the very definition of responsible business. In this new paradigm, organizations must take a leadership role in creating a positive impact on the society, at scale.

We are combining the passion and commitment of our people, our leadership in technology, and a diverse ecosystem of partners to drive innovations and programs that address issues that matter. We are building skills, bridging employment gaps, advancing client sustainability and accelerating equality in the workforce.
Our Corporate Citizenship work illustrates how we are:

### Innovating for Society

Through our Skills to Succeed initiative, we are helping drive inclusive growth. We work with underprivileged youth, women and persons with disabilities in India to prepare them for the digital economy. In FY19, Accenture volunteers spent more than 155,000 hours in community outreach through programs such as the Hour of Code and digital literacy workshops for workplace and facilities staff and spent more than 62,000 hours in providing pro bono technology support to our Skills to Succeed partners. We understand that using advanced technologies to better prepare people for the future must be an imperative because an unintended consequence of the emergence of the digital economy could be further marginalization of the underprivileged, especially in labour-dependent economies such as India.

Under our Technology for Good program, which uses intelligent technologies to solve complex social problems for citizens, we have helped in accelerating social transformation by creating accessibility solutions as well as empowering low-income communities. One of the applications we built, targeted at rural women and other low-income populations in India, helped users better understand financial products and services.

### Shaping Responsible Business

By the end of 2018, we grew our India workforce to approximately 40 percent women—toward our goal of having a gender-balanced workforce by 2025. A range of policies aimed at the LGBT community and persons with disabilities ensured that we push the boundaries of equality and inclusion in the workplace. As part of our commitment to preserving the environment, we have set a science-based target globally, committing that by 2025, we will reduce our absolute greenhouse gas emissions by 11 percent from our 2016 base year, with India leading the way and by 2023, move to 100 percent renewable, globally.

None of this would have been possible without the resolute commitment of our people. I would like to thank all our social innovators and volunteers, who worked alongside more than 50 Accenture-partnered NGOs across the country to change lives for the better.

I invite you to join us in this journey as stewards of an increasingly connected world. Let us commit to our collective vision of improving millions of lives across the country now and in the future.

**Rekha M. Menon**

Accenture in India
INNOVATING FOR SOCIETY

Discover how we are leveraging technology to help people across India

With the passion of our people, our technology expertise and a broad ecosystem of partners, we develop and scale innovations and programs that help address the society’s pressing problems. Nearly a decade ago, we took a defining step in our corporate citizenship journey. We launched our Skills to Succeed initiative to focus Accenture’s expertise in growing talent to address the global need to close skills gaps and prepare individuals to get a job or build a business. This set a meaningful precedent for our company and for our people—a commitment to taking the best of Accenture and applying it in a concentrated, strategic way to address complex social issues.

Today, our focus on innovating for society has grown well beyond what we envisioned when we launched Skills to Succeed.

We continue to explore new horizons with our clients and partners to equip more than 3 million people globally with the skills to get a job or build a business.
SKILLS TO SUCCEED

Closing skill and employment gaps for marginalized people

By the end of fiscal 2020, Accenture, together with its strategic partners, will equip more than 3 million people globally with the skills to get a job or build a business; enable their successful transition to employment; and create large-scale, lasting solutions aimed at closing global employment gaps. Since 2010, our Skills to Succeed initiative in India has been empowering youth and women from economically weaker sections and persons with disabilities by equipping them with skills needed for high-demand job sectors. The rapid pace and scale of technological changes are disrupting labor markets and fundamentally altering the future of work. It is with these challenges in mind that we are strategizing our Corporate Citizenship efforts—Inclusion in the Digital Economy.

We are applying the NEW in “Skills to Succeed” through our three-pronged approach—Digital Delivery, Digital Literacy and Digital Fluency that is transforming the lives of millions of people.

Equipped 690,000+ people with Skills to Succeed in India
Empowered 420,000+ people to get jobs or start an enterprise
Impacted 314,000+ women
Our Skills to Succeed projects focus on two outcomes: Employability and Entrepreneurship.

EMPLOYABILITY

We partner with non-profit organizations to bring to life our three-pronged approach—Digital Delivery, Digital Literacy and Digital Fluency—to extend employability skills training to youth in high-demand sectors, helping them secure jobs.

The curriculum focuses on foundational life skills such as growth mindset, tech know-how to thrive in an ever-changing digital economy.

PARTNERS

Don Bosco Tech: Providing employability training to youth in the hospitality, retail and manufacturing sectors across India

Anudip Foundation: Training on social media, analytics and cloud for jobs crowdsourcing platforms on newer digital and Web-based workstreams

Quest Alliance: Leading the charge on skilling India’s youth in this digital economy

In 2019 Cisco, Quest Alliance and Accenture inked an agreement with the Indian government to empower 1.5 million youth enrolled in Industrial Training Institutes (ITIs) by providing employability skills training—including English, life and work skills, and retail customer interaction. The training will be imparted through a blended learning curriculum that integrates the best practices of classroom and e-learning

Sambhav Foundation: Training construction workers through multilingual training videos in more than 10 construction trades

Pratham Education Foundation: Delivering employability skills training to youth in hospitality, electrical and health care trades
Aide et action India: Providing training to youth primarily in the retail sector, in addition to BFSI and Beauty Therapy Assistance

Magic Bus: Extending employability skills training to youth who are successfully placed in sectors such as retail, BFSI and ITeS

Medha: Providing employability, career awareness and counseling to college students in tier 2 and 3 cities

FISE: Training non-graduate youth in software skills to secure developer jobs in IT companies

In addition, we have partnered with non-governmental organizations (NGOs) that are targeted toward skill development of persons with disabilities:

Dr. Reddy’s Foundation (DRF): Training persons with disabilities in employability skills

TRRAIN: Bridging the vocational skilling gap and creating employment opportunities for persons with disabilities in retail

Enable India: With the support of Accenture, built Enable Vaani, a community-level platform that empowers persons with disabilities to share their experiences in the employment space, welfare measures, government schemes and community-level services
MICRO ENTERPRISE

We partner with non-profit organizations to train women in semi-urban and rural areas to acquire micro entrepreneurial skills to start a new business or grow their existing businesses. Business skills, financial literacy, marketing and digital skills are some of the key modules under this program.

PARTNERS

Mann Deshi Foundation: Providing training in technical, financial and marketing skills to marginalized women who have no formal education and girls who have dropped out of high school to become entrepreneurs; on successful completion of the training program, these women are awarded with Deshi MBA certificates; through the Chamber of Commerce program, providing hand-holding and mentorship support to women in making their business sustainable.

The Chamber of Commerce program is aimed at helping women make their business sustainable. The services include a toll-free number, mentorship, networking, exposure visit, market linkage and business advice.

Read India: Providing skills development/livelihood training to create multiple impact in a community through collaborative approach, supporting the overall development of a community.

Entrepreneurship Development Institute of India (EDII): providing entrepreneurial skills training to women and youth in peri-urban, rural areas. The training ensures beneficiaries acquire necessary skills needed to launch a new business.
A new vertical of supporting social enterprises that deliver large-scale social impact has been added to our portfolio. We are incubating three new social enterprises with Villgro focused on digital livelihood platforms.

Charities Aid Foundation (CAF): Providing training to women in making eco-friendly products; women with mental disabilities trained in converting discarded material into eco-friendly products

Mahila SEWA Trust: Providing training on making stationery products from recycled paper; Accenture procures certain products from the trust

Villgro Innovations Foundation is India’s oldest and foremost social enterprise incubator. Villgro incubates early-stage, innovative for-profit enterprises that have an impact on the lives of India’s poor.
At Accenture, we have always believed that a responsible approach to business is fundamental to success, protecting our people, our company and our clients, while differentiating us in the marketplace. The size and scale of our business gives us the opportunity to help shape business practices and society for the better, whether by creating innovative solutions with our clients or by working alongside our partners to support the communities in which we live and work.

Our employees regularly give back to the community and we facilitate in optimizing their contribution through various channels.

Employee Giving Program
As part of this initiative, employees contributed through their monthly salary, supporting more than 50 NGOs. This benefitted thousands of youth, women and children across India through projects on women empowerment, elderly care and training programs for persons with disabilities and youth.

Fundraising
Our people helped in raising funds for charity by participating in events such as Oxfam Trailwalker and Empower Run. More than 10,000 people across Accenture offices in India participated in the Empower Run and nearly 40 teams comprising four members each participated in the Oxfam Trailwalker.

Volunteering
We encourage community involvement through sustained interactions and skill-building opportunities. Our people contribute by volunteering in skill programs, executing pro bono with technology projects using advanced technologies such as Artificial Intelligence, Internet of Things and Robotics as well as by providing financial aid to partners through the employee giving program. The volunteers spent more than 155,000 hours in community outreach through programs such as the Hour of Code and digital literacy workshops through more than 50 NGOs that the company supports toward digital skilling efforts.

Pro bono
Our people in India worked for more than 62,000 pro bono hours in FY19 delivering capacity building projects across diverse areas such as:

- Consulting and strategy: Research, roadmap, fundraising, and technology
- Legal: Consultation and documentation
- Marketing: Fundraising pitch, brochures and presentations
- IT capacity building: Website, database management and process automation
- Knowledge management
TECHNOLOGY FOR GOOD

Technology that makes millions smile

Our Technology for Good Program leverages emerging digital technology to create unprecedented opportunities to shape the future of work and solve some of the complex problems in the society. Through the Technology for Good innovation ecosystem, businesses can now amplify their mission and their profits by leveraging the collective intelligence of regulators, academics, innovators and the society.

We address the needs of the society with differentiated go-to-market strategies powered by digital technologies and collaborative partnerships.

Key Solutions

GRAMEEN FOUNDATION

Intelligence on financial services

Applications targeted at rural women and other low-income populations in India to help users better understand financial products and services. These applications allow them to make informed choices that positively impact their financial and social well-being.

BLEETECH

Enabling hearing impaired dance students to feel the beat

It converts different sounds into unique vibrations for the hearing impaired to help them navigate their surroundings.

DRISHTI

AI-powered solution to empower and enable the visually impaired

Drishti, which means “vision” in Sanskrit, provides smartphone-based assistance using AI technologies such as image recognition, natural language processing and natural language generation capabilities to describe the environment of a visually impaired person.
AWARDS AND RECOGNITION

Brandon Hall Group Excellence Awards under the Citizenship Category in 2017

Avtar CSR Award in 2018
SHAPING RESPONSIBLE BUSINESS

Discover how we practice and promote responsible business around the globe

Environment

A decade into our quest to lessen our environmental impact, thinking—and acting—sustainably is part of our daily life at Accenture. We are committed to doing our part to protect the planet for future generations and in helping those around us to pursue their environmental goals. By improving the efficiency of our operations, harnessing the innovative spirit of our people and developing new sustainability solutions, we aim to accelerate the global shift to a low-carbon economy and reduce the impact of climate change.

Our People

A critical part of our talent strategy is continuously investing in developing and growing each of our 492,000 people as they work together to solve the most challenging issues across industries and organizations. Our ambition is to be the world’s most inclusive and diverse company. On the path to gender equality, we have set bold goals. For instance, we are well on our way to achieving a gender-balanced workforce, with 50 percent women and 50 percent men, by 2025.

We have forged partnerships with local PRIDE networks. With a local lead who acts as the driving force behind the program, our community of LGBT allies has grown significantly.

We prioritize accessibility for all, and over the past two years, we increasingly focused on the needs of our persons with disabilities.

Advancing Supplier Inclusion and Diversity

Creating value, championing change and empowering communities, we believe that inclusive procurement practices create long-term value for our clients and our communities, while enabling us to stay agile, disruptive and on the top of our game.
