

Driving trust: Distributed ledger for supply chain

Supply chain and logistics

A top priority in aerospace and defense

THE INDUSTRY COMPLICATIONS?

- Disruption
- Higher production rates
- Growth of aftermarket services
- Complex ecosystem
- Increasing traceability and security in the supply chain

The Solution?

- A combination of emerging technologies
- AI
- Distributed ledger technologies
- Extended reality

The Challenge?

Scaling across the aerospace and defense ecosystem

The Outcome?

Confidence in part authenticity and delivery

Powered by a distributed ledger for supply chain
