00:09
well the good thing is we are company
00:11
with Chinese roots but we have a pretty
00:12
international setup we use the best of
00:14
each region to make a great product and
00:18
make great services as a robotic company
00:23
I see Europe is really a huge chance so
00:26
my ambitions in Europe is we can join
00:30
the robotic company Europe to develop
00:34
the some of the latest technologies and
00:36
apply them in the European market
00:39

00:54
we have to become more pragmatic in
00:57
Europe I guess at the end it will happen
00:59
that's the most important thing and it
01:01
shouldn't run away from us so we should
01:02
be part of it then we can actually shape
01:04
it together with everyone else and I
01:06
just encourage everyone to start talking

01:09
with each other talk open and just try
01:12
to understand each other that helps a
01:13
lot
01:13
[Music]
01:17
ai is a very hot topic in in China in
01:23
Europe and the US
01:24
so we'll see more and more of the
01:27
products electronic products and also
01:29
software products and all the hardware's
01:31
all the robots
01:33
maybe cards with this AI technology
01:37
inside embedded inside this is I think
01:40
gonna be the next wave of innovation
01:54
