

Operations 360° Virtual Tours

CHENNAI

Network

Video Transcript

Welcome to the virtual tour of our Intelligent Operations Center in Chennai.

This short video can be paused at any point if you want to look around for longer. If you are watching this on your laptop, you can navigate the 360-degree experience using your cursor or touchscreen. You may also use a virtual reality headset for a fully immersive experience.

Ready?
Let's go!

Welcome to Chennai!

The cultural capital and gateway city of South India, Chennai is renowned for its education system and one of the highest literacy rates in India. The city is also a keeper of South Indian artistic, religious and culinary tradition.

Our Chennai Intelligent Operations Center is one of our 50+ centers around the world dedicated to enabling your journey to intelligent operations, and one of 13+ centers that specialize in driving exceptional innovation needed to build a Network function that's ready for the future.

This facility, like all our other locations, is fully ISO® 14001 Environmental Management System-Certified. From smart meters to renewable energy, we continue to assess and minimize how we impact our environment.

Our diverse teams of more than 14000 industry, functional and domain experts work together in a collaborative and innovative space at this facility.

This includes more than 500 professionals focused on network functions including Network Engineering & Optimization, Service Fulfillment and Service Assurance services.

It is here where we would work with you to deliver network business process services, using design thinking and our proprietary frameworks and technology-- ultimately evolving your network function to be insights driven and agile.

Core to our approach for delivering transformational growth is our SynOps operating engine.

SynOps combines the right mix of human and machine intelligence to create an environment for advanced data exploration; assessing processes and activities to see if they could be automated; and using real- time data to make decisions that matter to our clients

These elements give us all control to get ahead of the issues, before they become critical.

Exceptional talent.
Innovative technology.
Powerful Insights
Intelligence

SynOps is powering transformational growth.
