

VO: What's the power of AI?

VO: Does it have the power to protect against financial crime?

VO: By bringing webs of suspicious activity out of the dark — and under the magnifying glass.

VO: Continually learning how criminals think so it can better monitor their activity, ranking cases by importance and reducing false positives.

VO: Giving investigators the tools to mine massive amounts of data and zero in on threats.

VO: All while ensuring compliance with complex regulations.

VO: AI can help you protect your business, shareholders and clients from the threat of financial crime.

TITLE: VIGILANCE

TITLE: AI

VO: That's the power of artificial intelligence.

VO: That's New Applied Now.
