

VO: What's the power of AI?

VO: Does it have the power to help heal?

VO: By transforming vast amounts of patient data into vital insights — in an instant?

VO: Notifying patients when they're at risk, and helping them keep their recovery on track.

VO: Discovering new treatments and getting them to the people who need them the most, more quickly and safely.

VO: Helping doctors to care for more patients.

VO: And individually tailoring medicine with genetic data to be more precise than ever.

VO: AI can close the gap between diagnosis and recovery.

VO: That's the power of artificial intelligence.

VO: That's New Applied Now.
