

WORKPLACE DIVERSITY AND ACCESSIBILITY

VIDEO TRANSCRIPT

[00:00:00]

This video features images of 3 Accenture employees interacting with accessible technology and tools in their jobs. Accessibility at Accenture.

[00:00:29]

He is blind. Hi I'm Jonathan Bray. Jonathan is an extended reality lead developer in Ireland. He has autism. In my shoes. So to me innovation for accessibility is all about looking at the cool new technologies that currently exist and putting them to good use to make our world a more accessible place.

[00:00:50]

I used to operate my computer the screen reader NVDA and I use additionally one application on my cell phone the name is Seeing AI. How can I communicate with my colleagues in Spain and around the world? I use the Microsoft Teams app and read the subtitles in meetings but only in English.

[00:01:14]

I also use the Microsoft Translator app so that my colleagues talk with the microphone and it becomes text and I can read it. I have two high power digital hearing aids. When I think about accessibility in my workplace, the more important thing for me is the behavior of the people in my department because they really worry about my participation in all of the activities.

[00:01:43]To me inclusion is where I can feel like an equal member of the team and also not be afraid to be myself. Nothing for us, without us. Disability inclusion matters. Accenture.
