

NEW VALUE, NEW PROSPECTS: THE FUTURE OF ONSHORE WIND OPERATIONS AND MAINTENANCE

The onshore wind industry,
A story of growth...

Onshore wind is now among the most competitive energy sources globally.

But, good-bye incentives.

Now it's time for the industry to stand on its own two feet.

Maximize asset value around operations and maintenance (O&M).

5 themes for success to impact top-line revenues and the bottom-line value.

1. Don't underestimate the O&M bottom-line impact.
2. Move to predictive maintenance.
3. Don't overlook contracting and procurement levers.
4. Optimize spare parts supply chain.
5. Power up your workforce

The way forward?

It all starts with data set integration.

It is supported by digital investments.

It ends with new value, new prospects.

The future of onshore wind operations and maintenance is now.
