

### CO-DEVELOPMENT

Accenture brings world-class assets and capabilities to accelerate delivery and adoption of S/4HANA.

We co-develop with SAP diverse, discrete, functional end-to-end applications, design, development and user interfaces, including:

#### SAP S/4HANA Finance

#### SAP S/4HANA Enterprise Management

#### SAP S/4HANA Oil & Gas for Hydrocarbon Management

### CO-INNOVATION

Working with the SAP Oil & Gas Consortium, we define market standards and new industry solutions that harness the full business value of SAP S/4HANA, on premise or in the cloud.

**SAP S/4HANA Cloud** for upstream oil & gas delivers fully integrated processes including next-generation finance, hydrocarbon accounting, streamlined procure-to-pay, asset management and AI and machine learning.

**Upstream Production Operations** supports the upstream operations value chain including upstream hydrocarbon accounting management (SAP(C) UHAM).

**Connected Hydrocarbon Logistics** provides real-time total inventory of Oil & Gas companies' hydrocarbon supply chain. Cloud networking connects companies with suppliers and partners, optimizing hydrocarbon supply chain movements, visibility into secondary costs, reducing working capital.

### CO-DELIVERY

Accenture and SAP have simplified the way we deliver, and help run businesses.

Accenture has built SAP implementation templates to help oil and gas companies accelerate their journey to becoming Intelligent Enterprises.

**Accenture Upstream Direct** delivers a complete SAP footprint in 25 weeks.

**Accenture Downstream Direct** drives down logistics and inventory costs in 9 to 12 months.

Accenture is the first partner to achieve SAP-certified integration with **SAP(r) Model Company service**.
