

# ASSALA ENERGY IMPLEMENTS SAP S/4HANA

## VIDEO TRANSCRIPT

00:00  
[Music]  
00:01  
we're at exploration and production  
00:03  
company based in London we recently  
00:06  
acquired the assets of shell Gabon this  
00:10  
story of a sailor is not unusual where  
00:13  
new organizations backed by private  
00:16  
equity are coming in and acquiring  
00:17  
non-core assets from some of the oil and  
00:20  
gas majors  
00:21  
[Music]  
00:24  
we had a sort of six to seven months in  
00:27  
in order to bring the company up and and  
00:30  
have it fully operational as a small new  
00:33  
company we didn't want to over stretch  
00:35  
our ability in the IT space  
00:37  
[Music]  
00:40  
we've put it in the foundation with the

00:42  
with an S AP digital core we're using  
00:44  
the Hana enterprise cloud we know we've  
00:46  
worked with the with the HEC team and we  
00:49  
needed an implementation partner that we  
00:50  
could trust and we chose a combination  
00:53  
of opportune consulting and Accenture we  
00:56  
felt that they you know had the  
00:57  
experience in the oil and gas sector and  
01:00  
we knew that they brought with them you  
01:01  
know a template that would help us to  
01:03  
get going quickly we did a lot of  
01:06  
simplification as part of the  
01:07  
implementation to make sure that we were  
01:09  
as streamlined as possible to enable us  
01:10  
deliver in the timeframe that we had but  
01:13  
I think there's an ongoing benefit we've  
01:15  
now got a system that's relatively

01:17  
simple and standard and makes it easier  
01:20  
and lower cost of support and I think  
01:21  
down the line we will start to look at  
01:23  
some of the applications that sit around  
01:25  
that digital core in terms of how they  
01:26  
can also assist assala in in delivering  
01:29  
their business better more effectively  
01:30  
in it and a more cost efficient way  
01:33  
[Music]  
01:38  
you
