Change core business processes and elevate the workforce with AI automation.

Pre-built for multiple industries including:
- Health
- Public Service
- Software + Platforms
- Insurance
- Banking
- Utilities

"Organizations that reimagine the human and AI relationship—rather than replace people with machines—can improve operations by 10x, not just 10%.”

Cyrille Bataller, Solutions.AI for Processing Lead

Real client results
- 2-3x increase in workforce productivity
- 30-50% reduction in processing costs
- +25-50% accuracy improvement

Human and machine in harmony

40% of companies are reporting talent shortages that are impacting their ability to adapt and innovate. At the same time, the global pandemic has increased paperwork volume and process complexity by 10-100x. There has never been a better time to explore how AI can extend the human workforce. Those who strategically apply AI-powered automation can increase productivity, save time and enhance employee and customer experience.

Solution features

23 Patents, 16 Pending Patents, 14+ Languages

Process Discovery to identify opportunities to simplify, standardize and automate as-is business processes through data-driven discovery.

Robotic Process Automation to employ AI bots to automate business processes, tackling highly repetitive tasks quickly and accurately.

Document Automation to process structured, semi-structured and unstructured documents for fast and accurate data extraction and routing.

Image Automation to provide real-time alerts and insights through accurate analysis of satellite, aerial or other imagery, and video content.

Image automation applied to satellite imagery identifies and flags outliers that need human intervention.

3 ways AI-powered automation delivers immediate value

Image processing
Analyze high volumes of image or video content to monitor assets across locations, assess potential risk, and prioritize cases for human intervention.

Email or claims processing
Understand and route customer or employee emails or claims (across multiple languages), to the right support channel in an organization, enabling faster response, improved accuracy and increased user satisfaction.

Visual process discovery and process automation
Automate responses to common customer requests from social media and communications channels, whilst leaving more specialized responses to the human workforce.
