

High performance. Delivered.

2016 Tech Vision Trends Overview

Dr. Kaveh Safavi:

This year our tech vision has five trends. They are:

1. Intelligent automation – people plus machines.
2. Liquid workforce – people where I want them, when I want them.
3. Platform economy – your technology, my technology, my customer's technology all working together.
4. Predictable disruption – there's something, it's coming fast and it's going to need technology to solve it
5. Digital trust – keep my information safe and secure, but more importantly, only let people see it when I want them to see it.
