Identity confirmed, welcome back
Ms Strauss

Paul

Good morning, Ms. Strauss. For some time now, we have been tracking a threat affecting all of our clients, and this threat is becoming more real each day. That threat is digital disruption.

Around the world organizations are experiencing shake-ups in their industries. Allies have now become foes. Partners are now competitors. The Fortune 500 as we know it is no longer. Security in

this connected world is a major concern. Organizations and whole states are being infiltrated.

And this disruption is gaining momentum: our intelligence tells us 25% of the world's economy will be digital by 2020.

Because of its urgency, you'll need to bring on a team of your top agents. Like our clients, we need to put people first.

Your mission, should you choose to accept it, involves turning these threats into new opportunities. Already our operatives are helping leading organizations take advantage of digital technologies—with cloud as the foundation. They are helping transform organizations to outperform their competition.

Now, we need you and your team to step this up.

You need to help these clients to be built for change, be data-driven, embrace disruption, and be digitally risk-aware.

You will need to reinvent their organizations—and the culture within it—to drive innovation, to drive change, to drive the business into the next generation. You need to help them put people first.

I don't have to stress the importance of this matter, Terri.

As always, should any member of your team be caught, the Secretary will disavow all knowledge of your actions.

This message will self-destruct in five seconds.
