

SAP LEONARDO SOLUTION: INTELLIGENT CORPORATE DASHBOARD

Strategic decision support across business process areas within your organization

Function: Reporting | Process: Finance | Industry: Cross-Industry

Application Overview

Getting access to the best information in real time allows for the best decision making. The Intelligent Corporate Dashboard solution pulls together data from multiple sources into a single, dynamic dashboard. This tool allows executives to get instant insights into their company's performance through a balanced scorecard-based approach. This information enables strategic decisions across business process areas within an organization.

Business Value

- Direct deployability into environments, providing ready start with scalable data structures to design business KPIs using various data sources.
- Real-time data availability with live connections.
- Ad hoc analysis along with simulations, predictive forecasting and smart insights.
- Advanced visualization concepts to improve impact on the audience.

Technologies in Use

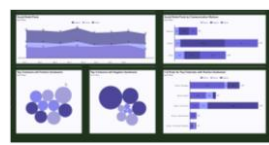

- SAP Leonardo Analytics Cloud
- SAP S/4HANA
- SAP SuccessFactors
- SAP Ariba
- SAP C4/HANA

Solution

An SAP Analytics Cloud-based solution that provides periodic corporate performance reporting targeted at senior executives up to C-suite participation, enabling real-time decision making.

Features
