14. ASSIGNMENT AND SUBCONTRACTING

14.1 Supplier is engaged as an independent contractor. Nothing in this PO/ agreement will be deemed or construed to create a joint venture, partnership or employment relationship between Accenture and Supplier (including its Personnel). Accenture will have no liability or responsibility for Supplier's personnel. Supplier will remove Personnel from any assignment under this PO/ agreement, for any lawful reason at Accenture's sole and reasonable discretion.

14.2 Supplier will not assign, transfer or subcontract this PO/agreement or its rights or obligations (including its data privacy obligations) to any third party (whether resulting from a change of control, merger or otherwise) without Accenture's prior written consent. In any event Supplier will remain solely responsible for any and all acts, errors or omissions of its subcontractors (including its sub-processors).

14.3 Accenture's rights, benefits and/or obligations under this PO/agreement may be assigned or transferred to any Affiliate. Supplier hereby provides its consent in advance for such assignment or transfer.

16.1 The Parties will make good faith efforts to resolve, in a confidential manner, any dispute which may arise under this PO/agreement, by escalating it to higher levels of management, prior to resorting to litigation or other legal process.

16.2 This PO/agreement and any dispute or matter arising under it will be governed by the laws of the country where the Accenture entity in this PO/ agreement is located, without giving effect to conflict of laws rules. Subject to Section 16.1, the courts of such country will have exclusive jurisdiction. The United Nations Convention on Contracts for the International Sale of Goods does not apply.

17. GENERAL

17.1 No delay or failure by either Party to exercise any of its powers, rights or remedies under this PO/ agreement will operate as a waiver of them. For purpose of this PO/ agreement an email will be deemed to be "written" or a "writing".

19.3 Security of All Software Components. Supplier will inventory all software components (including open source software) used in Deliverables and provide such inventory to Accenture upon request. Supplier will assess whether any such components have any security defects or vulnerabilities that could lead to a Security Incident. Supplier will perform such assessment prior to providing Accenture with access to such software components and on an on-going basis thereafter during the term of this PO/agreement. Supplier will promptly notify Accenture of any identified security defect or vulnerability and remediate same in a timely manner. Supplier will promptly notify Accenture of its remediation plan. If remediation is not feasible in a timely manner, Supplier will replace the subject software component with a component that is not affected by a security defect or vulnerability and that does not reduce the overall functionality of the Deliverable(s).

19.4 Security Assessment. If Accenture reasonably determines, or in good faith believes, that Supplier's security practices or procedures do not meet Supplier's obligations under their PO/agreement, then Accenture will notify Supplier of the deficiencies. Supplier will without unreasonable delay: (i) correct such deficiencies at its own expense; (ii) permit Accenture, or its duly authorized representatives, to assess Supplier's security-related activities that are relevant to this PO/ agreement; and (iii) timely complete a security questionnaire from Accenture on a periodic basis upon Accenture's request. Security issues identified by Accenture will be assigned risk ratings and an agreed-to timeframe to remediate. Supplier will remediate all the security issues identified within the agreed to timeframes. Upon Supplier's failure to remediate any high or medium rated security issues within the stated timeframes, Accenture may terminate this PO/ agreement in accordance with Section 12 above.

Supplier will comply with this Section if Supplier is providing Accenture with access to or the use of any software, including software-as-a-service or cloud-based software. Supplier will maintain and implement secure application development policies, procedures, and standards that are aligned to Industry Standard practices (e.g., SANS Top 35 Security Development Techniques and Common Security Errors in Programming and the OWASP Top Ten project). This applies to web application, mobile application, embedded software, and firmware development. All Personnel responsible for application design, development, configuration, testing, and deployment will be qualified to perform such activities and receive appropriate training on such policies, procedures, and standards.

Supplier will have a defined process to address any findings but will ensure that any high-risk vulnerabilities are addressed within 30 days.

19.7 Application Vulnerability Assessment. Supplier will comply with this Section if Supplier is providing Accenture with access to or the use of any software, including software-as-a-service or cloud-based software. Supplier will perform an application security vulnerability assessment prior to any new release. The test must cover all application and/or software vulnerabilities defined by the OWASP or those listed in the SANS Top Cyber Security Risks or its successor current at the time of the test. Supplier will ensure all high-risk

vulnerabilities are resolved prior to release. Supplier will provide a summary of the test results including any open remediation points upon request. Supplier will have a defined process to address any findings but will ensure that any high-risk vulnerabilities are addressed within 30 days

19.8 Penetration Tests and Security Evaluations of Websites. Supplier will have an industry recognized independent third party perform one of the quarterly tests. Supplier will have a defined process to address any findings, but any high-risk vulnerabilities must be addressed within 30 days. Supplier will provide a summary of such tests and evaluations, including any open remediation points, to Accenture upon request.

Access to such media and equipment will be restricted to authorized Personnel; ii) classify Accenture Data so that it is properly identified and access to it is appropriately restricted; iii) maintain an acceptable use policy with restrictions on printing Accenture Data and procedures for appropriately disposing of printed materials that contain Accenture Data when such data is no longer needed under this PO/ agreement; iv) maintain an appropriate approval process whereby Supplier's approval is required prior to its Personnel storing Accenture Data on portable devices, remotely accessing Accenture Data, or processing such data outside of Supplier facilities. If remote access is approved, Personnel will use multi-factor authentication, which may include the use of smart cards with certificates, One Time Password (OTP) tokens, and biometrics.

19.10 Access Control. Supplier will maintain an appropriate access control policy that is designed to restrict access to Accenture Data and Supplier assets to authorized Personnel. Supplier will require that all accounts have complex passwords that contain letters, numbers, and special characters, be changed at least every 90 days, and have a minimum length of 8 characters.

19.11 Cryptography. Supplier will maintain policies and standards on the use of cryptographic controls that are implemented to protect Accenture Data.

19.12 Secure Disposal or Reuse of Equipment. Supplier will verify that all Accenture Data has been deleted or securely overwritten using Industry Standard processes, prior to disposal or re-use of equipment containing storage media.

19.13 Operations Security. Supplier must enable logging and monitoring on all operating systems, databases, applications, and security and network devices that are involved in providing Deliverables. Supplier will maintain anti-malware controls that are designed to protect systems from malicious software, including malicious software that originates from public networks. In addition, Supplier will use anti-malware software (of Industry Standard or better quality), maintain such software at the then current major release, purchase maintenance & support available from the vendor for such software, and promptly implement new releases and versions of such software.

19.14 Information Transfer and Storage. Supplier will use Industry Standard encryption to encrypt Accenture Data that is in transit. Supplier will also use Industry Standard encryption to restrict access to Accenture Data stored on physical media that is transported outside of Supplier facilities.

19.15 Workstation Encryption. Supplier will require hard disk encryption of at least 256-bit Advanced Encryption Standard (AES) on all workstations and/or laptops used by Personnel where such Personnel are accessing or processing Accenture Data.
