Intelligent innovation in Consumer Packaged Goods

Future-ready expertise + world-class technology.
Opportunity in a rapidly changing landscape.

The rules of Consumer Packaged Goods are changing. With disruptors setting the pace and legacy back-end infrastructure looking increasingly untenable, it’s never been more important to harness digital’s potential across the value chain, and to aim to grow in a sustainable way that reflects human needs.

Those who are ready to capitalize on the evolution of technology – in particular AI, cloud, IoT and automation – can expect to achieve fast and scalable operations and direct-to-consumer services, better supply-chain visibility and forecasting, retailer and distributor insights and better shelf execution. Progressing to manufacturing 4.0 will enable you to achieve the most ambitious corporate sustainability missions.

While the pace, cost and complexity of creating connected and efficient, sustainable operations are massive challenges for traditional CPG businesses, Accenture brings the imagination and expertise to enable you to fully capitalize on Google’s world-class technology. We’re here to help the CPG sector navigate a reimagined landscape, through a combination of forward-thinking expertise and leading technical innovation.

The stage is set for some truly seismic shifts within the CPG sector. With Accenture’s front-line experience and Google’s capabilities across Alphabet assets, our combined forces can address your most complex challenges.
Future-ready technology – available today.

CPG businesses that aspire to a meaningful share of tomorrow’s market will be powered by future-ready technology, available today.

By embracing cloud-powered, connected infrastructure you’ll secure a better ecommerce experience, deploying intelligent, agile, digitally enabled platforms and operations at every touchpoint.

Rapid integration with third-party ecosystems will help to drive profitability, and data will be brought to the strategic forefront, underpinning decision-making and helping to create an empowered, diverse and data-fluent workforce.

The CPG landscape

- Growth stalling for the big brands
- Smaller, digital natives seizing market share
- Brands moving deeper into the home
- Brands require retailer and distributor channel insights
- Ecommerce and emerging product models changing the landscape
- Consumers expect 360-degree engagement from chosen brands
- Brands as connected ecosystems
The fast track to value. Seeing the potential above and beyond the cloud.

Many CPG companies are already using the cloud in some form, but the early adopters are ahead of the game. Accenture research shows that high-performer CPG businesses lead the way on embedding transformative sales capabilities and are ahead in investing in data and technology. So, the question is not ‘how do we use the cloud?’, but how do we maximize the business value of the cloud to compete with ‘digital native’ businesses that have reset expectations for how businesses in general, not just CPG companies, serve customers?

Traditional CPG businesses must elevate the cloud discussion beyond infrastructure and savings on IT run costs and make it a value-based discussion in support of the total enterprise and the highest-level CEO imperatives of revenue, true product innovation and differentiation, disruption by digital-native competitors, customers, workforce, ESG, security.

The Accenture Google Cloud Business Group aims to elevate the cloud conversation beyond the commonly accepted advantages, to illuminate the full potential and opportunity it can unlock.

Together, our imperatives are to:

- Scale innovation at pace
- Implement rapid change without disrupting day-to-day operations
- Gain first-mover advantage on emerging revenue opportunities
- Empower and enable the workforce
- Accelerate savings
- Prepare for cyber threats

It’s estimated that the largest CPG businesses will grow five times slower than smaller competitors over the next five years. These ‘digital native’ businesses are introducing new business models, putting the consumer at the heart and rapidly taking market share.
Accenture's deep, sector-specific and technology expertise, coupled with Google’s CPG industry-aligned solutions help clients meet business-case and self-funding requirements by rapidly scaling the building blocks of future-ready CPG businesses.

The way forward. Building blocks of future-ready CPG.

Unlock consumer growth with data powered insights

Unleash rich consumer insights and AI/ML for marketing mix optimization, predictive marketing, personalization at scale, and faster and better innovation.

Transform go-to-market in the omnichannel ecosystem

Accelerate CPG D2C and omnichannel initiatives, improve channel insights, brand store execution, and optimize sales route to market.

Drive connected and efficient, sustainable operations

- Enable a more intelligent supply chain, smart factory, sustainability, systemic agility and productivity
- A fast and scalable operation
- Supply chain visibility improved for better forecasting
- Progress to manufacturing 4.0
- Achieve corporate sustainability missions
- Increase productivity

The Accenture Google Cloud Business Group is a partnership designed to help you navigate this changing landscape. Accenture accelerates the innovation that Google technology enables.
Accenture. End-to-end CPG sector expertise and experience.

Accenture’s approach to transformation in the CPG sector is to bring a flexible development model with a cloud platform and digital decoupling approach, designed to empower you to scale rapidly on your developer-preferred platform. You’ll benefit from Accenture’s overarching cloud strategy, architecture and implementation competences.

- We’ll deliver innovation hubs, applied intelligence and technology advisory help to shape and transform, drive growth and profitability
- We power CPG clients through ‘cloud first’ and next generation application services using leading practices in automation, modernization and agility
- We bring expertise in designing, building, communicating and running experiences across the entire customer, employee journey, and deep knowledge of business process, industry-specific and function-specific services
- Proven ability to help CPG clients transition to more sustainable systems and improve environmental score
- We enable CPG businesses to perform with the agility of digital-first start-ups and disruptors and rapidly accelerate the speed at which CPG businesses act on sector trends
- You will be able to merge enterprise and third-party data and analytics with behavioral insights to understand the needs, mindset, expectations, intentions of customers and employees, and implement an advanced data and analytics platform that improves core decisioning accuracy and efficiency
- Re-architect your workforce and workplace with a higher-end/specialized plug-and-play workforce pool for specific CPG functions

Focus on core activities to consolidate market position

A major consumer cooperative wanted to improve the efficiency of commercial and operating processes, and to strengthen their financial sustainability. Accenture’s focus on back-office activities helped to improve commercial and sales network efficiency.
Google. In the CPG sector.

Google has helped CPG companies connect and understand the consumer across the path to purchase for over 20 years. Powerful infrastructure and world-class security and support give CPG businesses the freedom to innovate with lower risk, while Google Cloud creates a virtuous cycle powered by data and analytics.

- The world’s biggest digital advertiser, maintaining 9 products with over one billion monthly active users
- 90% of internet users reached via Google’s Video, Display, Search, Shopping and Apps*
- 57% of consumers use Google search during their purchase journey*

* Business Intelligence Insider, August 2022

By partnering with Google Cloud, CPG businesses gain access to One Google enterprise technology and culture:

1. Leading AI/ML expertise
2. Infrastructure and security built for billions of users
3. Unique access point for user-level advertising data for Google-based digital campaigns

CPG-specific apps

- Ecommerce Migration / Ecommerce Modernization
- Apigee API Management
- AppSheet for CPG
- Shelf Execution Solution
- Product Discovery
- Recommendations AI
- Search for Retail

Modernizing digital B2B

We helped a major cosmetics company migrate its entire global infrastructure to Google Cloud in just 22 days for a 50% reduction in IT costs and 50% reduction in energy consumption.
Future-ready CPG businesses will be powered by multi-cloud capabilities, data and analytics, to enable true customer-centricity and develop new business models.

Using flexible, scalable, cost-effective technology will bring greater efficiency and profitability from direct-to-consumer and omnichannel initiatives, as well as new business model, products and innovation.

The aim is to create organizations that are purpose-led and human-centric, aligned with modern consumer values. Future-ready IT enables you to incubate new brands, innovations and acquisitions, and to identify focused areas for investments. CPG organizations will benefit from a more intelligent supply chain, smart factory, sustainability and systemic agility and productivity.

Accenture accelerates the innovation that Google technology enables. Together, we are helping CPG companies navigate the changing landscape and capitalize on opportunities.

A powerful partnership to deliver your future vision.

Empowering global collaboration to serve families worldwide

By migrating tens of thousands of users to Google Workspace in just 6 months, a global personal and homecare goods manufacturer saved time and costs spent on routine collaboration, increased employee engagement with customers, colleagues and partners without compromising security.
