them a convenient checklist of all their entry requirements into Singapore.

We also have ChangiQ which is a digital platform that allows passengers to schedule their check in and security screening times.

Peter Moore, Regional Managing Director, Asia Pacific and Japan, Public Sector, AWS

AWS serverless, and machine learning capabilities meant prototypes can be rapidly designed and scaled.

These new digital products were built end to end and deployed in 4 weeks!

Divyesh Vithlani, Market Unit Lead, Southeast Asia, Accenture

Changi Airport can now focus on powering the business of experience, becoming even more agile and generating new value as they reinvent passenger experiences.

Peter Moore, Regional Managing Director, Asia Pacific and Japan, Public Sector, AWS

Changi Airport Group continually maintains excellence through innovation, leveraging the breadth and depth of AWS services.

Jeff Loke, Senior Vice President, Singapore Changi Airport

The safe travel concierge application was built as a one stop portal for all passengers, to allow

Divyesh Vithlani, Market Unit Lead, Southeast Asia, Accenture

We knew we had to combine the latest approaches (like design thinking, rapid prototyping and agile delivery) with the latest technologies (including Edge, Artificial Intelligence and Machine Learning), and that the cloud was absolutely the right foundation.

They have leveraged the breadth and depth of AWS services.

Jeff Loke, Senior Vice President, Singapore Changi Airport

As we are transitioning from a pandemic to an endemic situation, it is important that Changi continues to utilise the latest digital innovations so that Changi can emerge stronger from this crisis.
