

ACCENTURE + COUPA: SUSTAINABLE BY DESIGN

VIDEO TRANSCRIPT

Julie Sweet [00:00:04] The power, actually, of our partnership is understanding not just the technology, but industry by industry, what are the personas? What do they have to source? What is the supply chain look like?

Jesse Hanger [00:00:20] Accenture has a global team of more than 1000 Coupa specialists. We continually invest in innovation to deliver on the promise of technology and human ingenuity. We are one, global, integrated team. That means 24-7 'Follow the Sun' support for all of our Coupa clients.

Karen White [00:00:39] We partnered with Coupa to help a UK headquartered client implement the full Coupa BSM suite to 57 countries around the world. At Accenture, our Coupa team spans nine countries with a unified focus empowering our clients to drive savings, improve controls, deliver a great end user experience and attain their sustainability goals.

Terry Horton [00:01:07] We worked with Coupa to design and optimize the supply chain network of one of North America's largest food distribution companies. Bringing together offshore and onshore resources, the Accenture Coupa team delivers operational cost reductions and improved efficiencies.

Kathryn Mouton [00:01:25] Accenture is currently guiding a large Japanese company through their technology led transformation. Our global Coupa practice includes people in 40 countries, with a dozen of those in Asia Pacific. Our teams are built to provide local language and country specific expertise to reduce the risk in large multinational programs.

Jesse Hanger [00:01:46] To support these clients and more, Accenture is actively acquiring relevant businesses like Xoomworks to bring new capabilities to the platform. We are committed, along with Coupa, to drive sustainable outcomes and help our clients achieve their ESG goals. This is how Accenture delivers on the promise of technology and human ingenuity.
