

Digital Transformation Journey Video

Digital is changing everything, and the opportunity to improve business performance has never been greater. That's why Accenture and SAP are collaborating at an unprecedented level—from development through delivery—to fully unlock the potential of SAP S/4HANA. We've launched a bold, new program with four key components:

1. We are fusing our intellectual property to accelerate the development of SAP's S/4HANA digital core.
2. We are driving industry innovation—developing and delivering SAP S/4HANA industry cloud solutions. We are already collaborating in chemicals, consumer products, life sciences, oil and gas, retail and utilities with plans for even more industry solutions in the future.
3. We are scaling SAP cloud services and delivery.
4. And we are providing selective, joint consulting and implementation services that enhance and accelerate digital transformation for our clients.

Together, we can enable unprecedented speed-to-value with our extensive industry and functional digital roadmaps.

Here's how we're going to get started:

Accenture and SAP will work with you through a Collaborative Business Case and Roadmap workshop that will help you:

- **DRIVE** digital transformation with SAP and ecosystem solutions
- **GUIDE** investments in industry and core solutions
- **DEFINE** an end-to-end technology strategy and implementation roadmap and
- **SUPPORT** the right technology investments.

In 2 hours, Accenture and SAP will provide a perspective and analysis of digital transformation happening in your industry.

In 2 days, we'll identify the areas of greatest value in your industry and align them to your specific business imperatives.

Then, in 2 months, we'll create a digital transformation strategy and roadmap tailored just for you.

Accenture is working directly with SAP to co-develop their core product and combine our best assets, capabilities and knowledge to help shape your SAP S/4HANA digital transformation journey.

We are ready now. Let's get started.
