

A large, stylized orange chevron pointing to the right, serving as a background for the text.

High performance. Delivered.

# Accenture Software for HCM

## Video Transcript

Accenture Software for Human Capital Management has many years of experience supporting the daily needs of HR Managers around the world. Today, we have over 1,800 customers across 40 countries.

Accenture Document Composer helps customers in the creation and distribution of employee-related documents enabling users to build and manage templates easily.

It offers a thumbnail preview of all existing documents. By using the „grouping“ functionality documents meant for a specific purpose can be organised by a simple drag and drop. Intuitive menu icons help with editing, copying or deleting templates.

What You See Is What You Get, so you can not only preview the document but also edit it, generate a PDF, download or despatch via E-Mail.

Accenture Document Composer offers a compelling user experience.

You can search for employees or templates from the same window - Help and documentation are just a button click away.

A modern and intuitive on-screen wizard helps reduce training costs and increase user acceptance.

Accenture Document Composer is a powerful tool, based on many years of experience and a deep understanding of document creation needs.

The WYSIWYG editor offers helpful „in-template“ editing features. Filters can be set to target a specific group of employees.

Data fields are easily added by simply typing in a hashtag. Yellow marked sections allow for adding a personal touch to letters.

Accenture's 30-years history of collaboration with SAP has led to meaningful add-on solutions that provide business value.

Accenture Document Composer is part of our growing portfolio of cloud-based solutions empowering your employees and managers to perform many of the functions by themselves.
