

## Accenture Asset and Operations Services

Accenture + Cimation = Unmatched provider of end-to-end industrial asset and operations services

High performance. Delivered.

The Industrial Internet of Things (IIoT) is transforming companies and countries—opening a new era of economic growth and competitiveness. The intersection of people, data and intelligent devices will have far-reaching impacts on the productivity and efficiency of industrial operations around the world.

To help asset-intensive industries better leverage the IIoT, Accenture has acquired Cimation, an operations consulting company known for its work in asset automation, operations information technology (IT) and industrial control system (ICS) cyber security.

Together, we help clients transform how they maintain, operate and optimize their plants, wells, refineries, mines, power generation facilities and pipelines.
