

# High Performance IT Research IT execution, IT agility and IT innovation

High performance. Delivered.

## Video Transcript

Speaker: Paul Daugherty,  
Chief Technology Officer, Accenture

The Accenture High Performance IT survey looks at the entire footprint of the IT organization and assesses the performance of IT across three key dimensions: IT execution, IT agility and IT innovation.

What we do is we look at all the responses across the organizations, calculate what the mean is across the organizations, and those organizations that stand out significantly above the mean are the ones that we characterize as the high performers that really drive the results that we see.
