High performance. Delivered.

Energy Downstream Direct

Video Transcript

Downstream oil and gas companies need to be more agile than ever to overcome:

- Global refining overcapacity
- Sluggish fuel demand
- Costly, mature assets

That's why we created Accenture Downstream Direct.

By using real time data, downstream companies can make better, faster decisions.

Accenture Downstream Direct will bring:

- Hydrocarbon logistics for commercial advantage
- Preventative maintenance for safer, more efficient plants
- Strategic sourcing to reduce material costs

Simplified back-office functions = more time for insights = rapid improvement.

Only Accenture is working with SAP to build the next generation of Downstream oil and gas solutions.

That's a pretty special partnership.

Let's get started.
